

> CyberPrism Assure

Our Governance, Risk and Compliance product tracks and scores progress using all available data in a unified, workflow-based system. It gathers and manages all evidence of compliance against any policies and standards in a single process.

> TAKE CONTROL OF YOUR
OPERATIONAL TECHNOLOGY

> CyberPrism Assure

CyberPrism Assure is an intuitive and completely customisable portal-based system.

Multiple contributors, including internal staff and external supply chain partners, can log in to answer questions and upload evidence, and a powerful data collector can audit devices automatically to gather information for technical controls.

Import external policies and standards, configure your own, or use a combination of the two. Build a fully customisable picture of progress and compliance across numerous requirement sets.

> SET THE MODEL

TECHNICAL
